

Carrie Gale - Junior Full-stack Software Developer

Sydney, NSW | P: +61415964862 | E: carriegale2710@gmail.com | [linkedin.com/in/carrie-gale](https://www.linkedin.com/in/carrie-gale) | github.com/carriegale2710 | Portfolio (carriegale.com)

SUMMARY

Junior front-end/full-stack developer with a focus on UI/UX and design-to-code delivery, plus AI model training experience. Top 12 of 1,000+ for _nology's Pathway to Tech 2025. Top 6/60 finalist, Startmate Founder Challenge 2024. Founder, USyd MIXSOC.

EDUCATION

Queensland University of Technology — Graduate Certificate of IT

Remote | Feb 2026 – Jul 2026

_nology — Pathway to Tech Program (Full-Stack Software Engineering Bootcamp)

Remote | Mar 2025 – Jul 2025

The University of Sydney — Bachelor of Arts (Design & Digital Cultures)

Sydney, NSW | Mar 2020 – Dec 2023

TECHNICAL SKILLS

Frontend & UI/UX: TypeScript/Javascript, React, Next.js, Tailwind CSS, Figma

AI/Agentic Systems: Agentic system design, custom skill & orchestration authoring, LLM output evaluation

Also proficient in: Java/Spring Boot, Python/Flask, Node.js, SQL (MySQL/PostgreSQL)

Tooling: Git, GitHub Actions CI/CD, AWS, Render, Supabase

Testing: Jest, JUnit, Mockito, Rest Assured

RELEVANT WORK EXPERIENCE

Outlier / Scale AI — AI Prompt Designer & AI Model Tester (Freelance)

Remote | Mar 2025 – Present

- Completed 50–100 in-depth, multi-prompt evaluation tasks (2–6 hrs each) across 4–6 projects spanning general reasoning, data science/data manipulation, audio/music, and research-intensive domains, applying strict rubric criteria and golden-example benchmarking (prompt engineering principles).
- Currently evaluating AI-generated UX/UI design and front-end code output (Figma, Google Stitch) on a specialised model-training project — scouted directly for design and front-end expertise.

_nology — Software Engineer Intern

Remote | Jun 2025 – Aug 2025

- Built the backend for a new student notes feature end-to-end in NestJS/MySQL — controller, service, entity, DTO, and module layers, plus a database migration and 50 seeded records — for _nology's internal Student Tracker application (NestJS/Next.js/Playwright stack).
- Implemented role-based permission logic across 3 user roles (Admin, Coach, Student) governing 3 REST endpoints; tracked work via GitHub Issues and validated changes in Postman before shipping through senior-developer PR review.

Startmate — Student Fellowship

Sydney, NSW | Dec 2024

- Selected as a top-6-of-60 finalist; led UX/UI design and ran sprint workshops to take an accessibility-focused e-commerce concept (beauty products, for users with mobility, vision, and sensory disabilities) from idea to interactive prototype.
- Tested early prototypes with real users to surface accessibility pain points and translated findings into technical specs through iterative stakeholder workshops; pitched the concept at the fellowship's VC pitch competition, and it's now progressing through UX/UI research validation ahead of an MVP build.

Self-Employed — UX/UI Designer (Freelance)

Sydney, NSW | May 2023 – Dec 2024

- Delivered UX/UI design audits and website redesigns for e-commerce clients; used Hotjar session data to diagnose usability issues, improving accessibility scores by 25%.

PROJECTS

Employee Creator App — Java, Spring Boot, MySQL/PostgreSQL, React, TypeScript, Tailwind, AWS/Render

- Built a secure RESTful API and React/TypeScript front end solo, optimising database queries to efficiently handle multiple concurrent employee records.
- Achieved a 100% pass rate across 40+ automated unit and end-to-end tests (Jest, JUnit, Mockito, Rest Assured) covering the full stack.
- Automated deployment to AWS/Render via GitHub Actions, with Log4j logging and health checks for production monitoring.

Library Website & Item Assessment Portal — Python, Flask, MySQL/PostgreSQL, Jinja, Bootstrap

- Built the core authentication system (login, registration, session management) and role-based access control via custom decorators, protecting a restricted Indigenous cultural collection across multiple user roles.
- Unified a 5-person team's codebase by converting all contributors' routes into a consistent Flask blueprint pattern, reconciling model/view inconsistencies across 4 contributors, and replacing hardcoded UI data with live MySQL queries.
- Implemented database-driven status-transition workflows (e.g. Pending → Public/Restricted) with role-based permission checks, duplicate-request prevention, and audit tracking; solely deployed the live demo to AWS EC2 with a secured custom HTTPS domain.

Peritia — Agentic Skill Library & Agent System (WIP) — Claude Code, GitHub Copilot, Perplexity/GAIA

- Forked and substantially refactored an open-source Claude-Code-inspired agent framework (GAIA) for Perplexity Spaces, improving output quality, modularity, and customisation.
- Built and maintain an agent-agnostic skill library of 30+ skills (20+ adapted, 10 self-authored orchestrators) across Claude Code, GitHub Copilot, and Perplexity/GAIA, applying it to ongoing personal SaaS project work.

ACTIVITIES & ACHIEVEMENTS

MIXSOC (University of Sydney Society) — Founder & President

Sydney, NSW | Jun 2021 – Jun 2022

- Founded a multicultural society; led a 17–20 person exec team running 20+ annual events for 300+ attendees.
